## About CEMEX

CEMEX Construction Services Ltd is a UK-based provider of services to the construction industry. We are part of CEMEX a growing global building solutions company that provides high quality products and reliable service to customers and communities in more than 50 countries throughout the world. The company has a rich history of improving the well-being of those it serves through its efforts to pursue innovative industry solutions, efficiency advancements and to promote a sustainable future.

- Annual sales of more than US\$15 billion
- Presence in over 50 countries
- World's leading supplier of ready-mixed concrete and one of the largest producers of cement and aggregates
- More than 50,000 employees worldwide

In the UK, CEMEX is a £1bn turnover building solutions business and a leading provider of Readymix concrete, aggregates, cement and asphalt with over 500 locations across the UK ensuring quality local materials. CEMEX UK also has a significant share of the roof tile, concrete-block paver and concrete block markets, and is the leading supplier of concrete sleepers to the UK's rail industry.

Our core values are essential to our efforts to be a more sustainable and responsible company:

- **Collaboration**  
CEMEX works with stakeholders to develop programs that meet their needs.
- **Leadership**  
CEMEX aims to be a leader in the effort to build a more sustainable future for our company and industry, our global society, and our planet.
- **Integrity**  
CEMEX insists that all employees carry out their responsibilities in line with the highest ethical standards.

## Capabilities

CEMEX provides a comprehensive service offering to a vast spectrum of public and private sector construction customers, utilising an extensive range of company resources, supported by our specialist partners, and an established supply chain. CEMEX designs, constructs and maintains the infrastructure assets of clients, and support others to do the same. CEMEX promotes involvement at the earliest stage, to derive the maximum benefit from our service for everyone, and our involvement only ends when our clients want it to. CEMEX builds sustainable, long-lasting relationships with clients and partners to improve our service, and their outcomes.

CEMEX is able to provide and install a full range of primary and secondary construction materials, to provide the surety of a low cost base for a significant proportion of the overall build cost for the majority of construction projects. For the largest projects CEMEX can provide on-site facilities for the production of asphalt and concrete, as well as processing site-won aggregates for re-use.

With a commitment to sustainable construction solutions CEMEX can also offer a portfolio of secondary and recycled products, using cutting edge technology to utilise existing infrastructure assets as the basis for new construction.

CEMEX is continually developing new products and processes to fulfil the current and future needs of our clients across numerous market sectors, with specific resources dedicated to research and development.

### Our areas of expertise:

- **Highways**

A comprehensive spectrum of highway construction and maintenance solutions for contractors and private sector clients.

- **Infrastructure**

Building and maintaining infrastructure for developers, retailers, contractors and local authorities. From roads and car parks to drains and sewers, to foundations and structures.

- **Airfields**

Airside and landside construction for civil and military airfields.

- **Network Maintenance**

Comprehensive maintenance support to network owners and operators on principal and local networks throughout the UK.

- **Specialist Services**

A bespoke range of products and services to address specific needs of our construction sector clients in specialist areas.

## Highways

For major contractors, CEMEX is able to provide a comprehensive service to install flexible or rigid pavement construction, from capping upwards, utilising state of the art, fully automated paving equipment.

CEMEX provide the entire spectrum of highway construction and maintenance solutions for contractors and public sector clients, from the design and construction of new carriageways, to routine resurfacing.

For highway asset managers CEMEX are able to provide a complete renewal service for worn out carriageways and associated infrastructure, including;

- Full reconstruction of flexible and rigid pavements
- Carriageway widening
- Resurfacing and roadmarkings
- Crack and seat technology
- Refurbishment and strengthening of highway structures
- Traffic management
- Road restraint systems (steel and concrete)
- Drainage repair, replacement and refurbishment
- Streetlighting installation and refurbishment
- Installation of sign gantries
- Installation and renewal of communications systems

## Infrastructure

CEMEX builds and maintains infrastructure for developers, retailers, contractors, and local authorities. From roads and car parks, drains and sewers, to foundations and structures, CEMEX is able to provide the complete infrastructure service.

With the support of a nationwide network of material production facilities for aggregates, concrete, asphalt, concrete products, and drainage materials, CEMEX can deliver high value, cost effective infrastructure solutions.

CEMEX specialise in building long-term relationships with our infrastructure clients, such as our partnership with B&Q to deliver environmentally friendly roads and car parks nationwide.

## Airfields

CEMEX understands the needs of the airfield operator and is able to deliver pavement and infrastructure construction services in the demanding environment of civil and military airfields, whether airside or landside.

For airfield pavements, CEMEX's huge inventory of natural resources, combined with extensive technical knowledge, ensures the design of pavement materials to surpass client expectations. Our paving fleet includes the world's most advanced machines, incorporating 'fly by wire' technology to ensure an exacting finish.

## Network Maintenance

CEMEX provides comprehensive maintenance support to network owners and operators on principal and local networks throughout the UK. CEMEX delivers carriageway repair and renewal services and much more to our partners working on the UK's trunk road networks, as well as maintaining thousands of miles of local authority roads. CEMEX understands the importance of keeping the network moving, and carry out the majority of work on principal routes at night, ensuring that the road user rarely sees us.

CEMEX provides emergency response, winter maintenance support, and highway survey services on the local networks, a customer-focussed approach, with total awareness of the street scene environment and the balanced needs of all stakeholders ensures client confidence. When it comes to meeting the needs of the network manager, CEMEX delivers.

## Specialist Services

CEMEX deliver a range of products and services to address the specific needs of construction sector clients in specialist areas.

These areas include:

- **Viapave® Type R**  
Thin wearing course with 25% recycled aggregate.
- **EME 2**  
Designed for the use in UK road construction for the main structured layer in new build and refurbishment schemes.
- **Viashade®**  
CEMEX can install bituminous pavements in a range of colours.
- **Viashade® Natural**  
An aesthetically pleasing natural aggregate finish achieved through a secondary process.

## Commitments

CEMEX is a progressive, growing and forward-looking company. Our aim is to be the number one building solutions company in the UK in terms of quality, technical excellence and customer service.

### Sustainability Statement

As one of the UK's largest suppliers of building material solutions, CEMEX UK is committed to sustainable development across the business. The principal operations of our business are raw materials extraction, processing, re-using, recycling and distribution of building materials.

CEMEX embraces the challenges of sustainable development, in striving to be socially, economically and environmentally responsible in everything we do to safeguard the needs of future generations. And from a commercial perspective, a sustainable approach will allow CEMEX to continue as a preferred supplier to the industry, to drive further efficiencies and ensure long term resources.

To deliver this promise CEMEX track the following indicators:

1. Reducing emissions
2. Improving efficiency of production and logistics
3. Developing innovative new products and services
4. Engaging employees
5. Increasing transparent dialogue with stakeholders
6. Measuring and controlling impacts
7. Contributing to sustainable communities

### Our accreditations:

- ISO EN 9001 for quality management
- ISO EN 14001 for environmental management
- OHSAS 18001 for health and safety management
- Investor in people
- Considerate Constructor
- National Technical Centre of Excellence - UKAS Accredited Research and Development facility
- Received a "Pass" for the Highways Agency Safety Management Assessment (SMS) in 2006 (possible results are either "Pass" or "Fail")

**In providing construction services, CEMEX set the standards**

## Partnerships

CEMEX delivers quality services for public and private sector clients throughout the UK and the world.

Our construction clients include:

- Central government
- Local authorities
- Other public agencies
- Integrated service providers
- Contractors
- Developers
- Asset owners and operators
- Commercial organisations
- Individual private clients

A commitment to excellence in client management, performance measurement, stakeholder feedback, and continuous improvement, ensures full collaboration right across the value chain.
