

INTRODUCING NEXT GENERATION **ISOMILL 4000 SERIES**

Enabling up to **25% energy savings** in production activity.

The next generation of high-performance grinding aid technology for the cement industry and milling companies – **targeting added efficiency and strength.**

More reliable and robust performance to give you the confidence you need. Backed by cement and readymix technical expertise, giving you the support and re-assurance time after time.

- Unique design enhances the strength performance of cements by up to 20%
- Improved operational efficiency and production throughput, provides energy savings of up to 25%
- Enables additional downstream benefits in concrete production, when cements used with other admixtures
- Enables lower carbon footprint
- Higher share of renewable raw materials
- Bespoke solutions and customized efficiency improvements
- Trained driver fleet and packaging return service
- CEMEX Admixtures Live – digital order application

ADDED PERFORMANCE

ADDED EFFICIENCY

ADDED SUSTAINABILITY

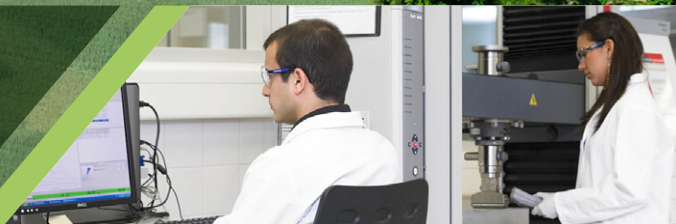

ADDED EXPERTISE

Enabling energy efficiency

As part of our wider Future in Action strategy, the Vertua® Admixtures range enables sustainable urbanisation and low carbon concretes.
