Asphalt

Bitukold 15KG

A cold applied joint sealant for vertical joints. For small patches this product can be used as a tack coat saving the need to use a separate tack coat emulsion.

Applications include: Vertical joints, patch repairs, trench reinstatements, kerb channels, drain or manhole frames.

H4 Joint Sealant 25KG

A hot poured joint sealant for the treatment of reinstatements and asphalt overlays.

Applications include: Vertical joints, patch repairs, trench reinstatements, kerb channels, drain or manhole frames. Please follow any safe handling procedures provided.

Leotak 25KG

A cold applied, rapid acting emulsion. When cured, it forms a thin but uniform film of bitumen on the road surface giving an adhesive bond between a bituminous overlay and the existing surface.

Applications include: Carriageways, footways, car parks.

Leoclean Trigger

Leoclean is ideal as a heavy duty cleaner for removing mineral oil based problems such as bitumen, tar, asphalt, grease and carbon. Removes waxes, adhesives, uncured paint & varnish, and also oil based inks.

Bitucrete

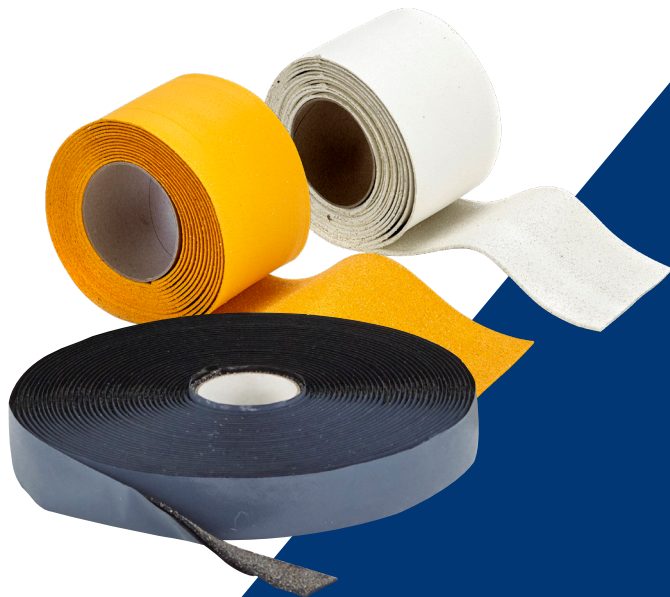

A deferred set, storage macadam which has been approved by the BBA for use as a first time permanent repair material in footpaths & cycle tracks.

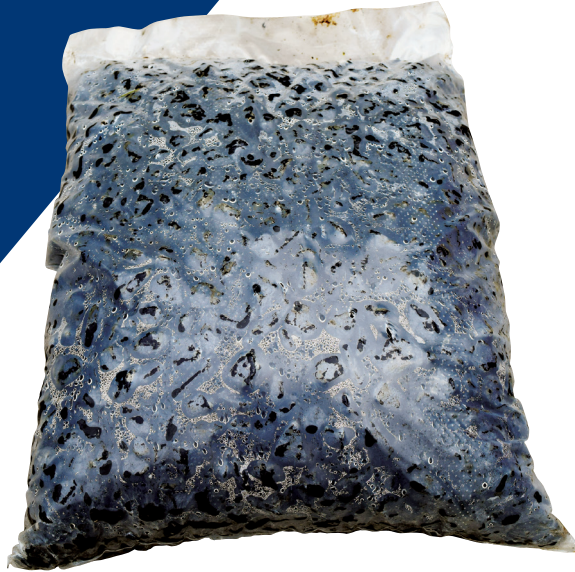

Eurolines Available in White & Yellow

Eurolines are skid resistant thermoplastic markings designed for demarcation and lining. They are non-toxic, contain no lead or chromate pigments and are skid resistant to >55 SRV. 5m rolls.

Overbanding

Self-adhesive overbanding and crack sealing tape that is quick and simple to apply, providing a superior finish which will prevent water ingress and progressive fretting. Anti-skid properties that are compliant to the New Roads and Streets Works Act. 25m rolls.

Pre-Coated Chippings

Manufactured to the highest standards with ISO 9001 quality and ISO 14001 environmental certification.

Applications include: Spreading on Hot Rolled Asphalt surface course prior to compaction, providing surface texture and skid resistance. (25KG)

Tar Brush

Tar brushes are perfect for rough surface applications of viscous coatings such as bitumen. Available in 2 lengths.

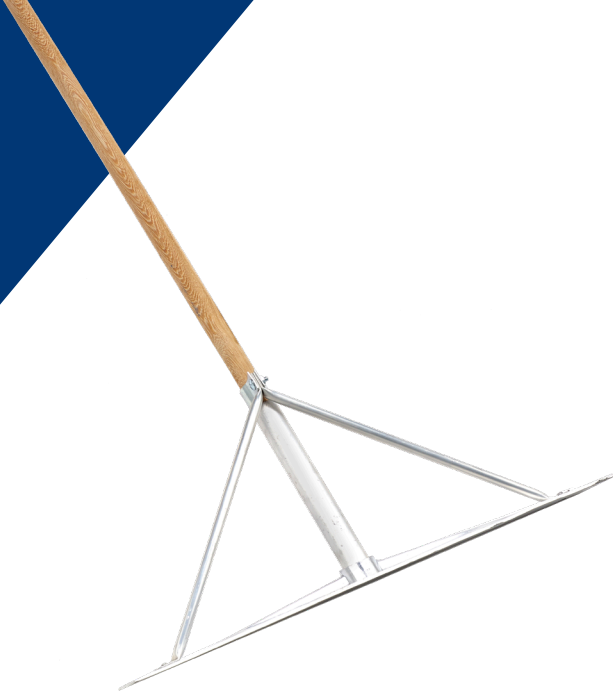

Asphalt Rake

Ideal for spreading and raking asphalt evenly. Sturdy and durable, the tines on this rake are designed to allow the easy movement of asphalt into its required position.

Truck Sheets

Ideal for covering asphalt and keeping it warm. Supplied with ropes and eyelets for easy fit to vehicles. Made to last - highly durable for harsh conditions. Manufactured from natural fibres so environmentally friendly.

Aluminium Spazzle

Used for levelling and maneuvering asphalt and a variety of loose materials. These aluminium spazzles are lightweight, durable and comfortable to use on all surfacing applications.

Wooden Spazzle

Used for levelling and maneuvering asphalt and a variety of loose materials. These wooden spazzles are lightweight, durable and comfortable to use on all surfacing applications.

Asphalt Punner

A tool for consolidating and finishing work on asphalt paving and roads - its designed to finish close up to walls and corners where mechanical rollers would leave a ridge.

Asphalt Shovel

Our heavy duty asphalt shovels are designed to last and ideal for transferring material into place. A superb must have everyday essential for professional contractors.
