

Sports Gravels are available for use in many specialist sports applications. Selected Sports Gravels have been tested by the Sports Turf Research Institute (STRI) and conform to key USGA requirements for use as a drainage carpet layer.

applications:

- Sports drainage (Polo, Golf, Football, Rugby, artificial etc.)
- Golf putting green construction (drainage carpet layer)
- Construction and renovation
- Domestic and commercial landscaping

tested by the sports turf research institute (stri)

Our sports gravel has been approved by the Sports Turf Research Institute

consistency in grading

Our sports gravel boasts a consistent grading to deliver reliable performance

low silt content

A low silt content ensures that sports gravel performs at optimum levels

cleanliness demanded by contractors for these applications

Our sports gravel is double-washed, conforming to the high demand of cleanliness from contractors

characteristic

result

Hydraulic Conductivity	Drainage
Double washed aggregate	Cleanliness
Consistent grading	Reliability of performance
Durable fine aggregate	Stable in service performance
Natural aggregate	Free of contaminants
Consistent grading	Reliability of performance
